

SPECIFICATION SHEET

Product name:	Human Hsp90 α A1 protein	CAT# : L2C02901
Protein description	Recombinant Human Hsp90 α A1 protein	
Molecular weight	85 KD	
Expression host	Escherichia coli	
Form	Liquid	
Purity	> 80 % by SDS-PAGE	
Purification notes	Sephadex derived purification.	
Concentration:	1.0mg/ml	Lot: L170701
Storage buffer	0.01M PBS, 0.15M NaCl, 2mM EDTA pH 7.4	
Preservative	None	
Storage instructions:	Store at <-20° C . Avoid repeated freeze / thaw cycles.	
Application	ELISA ;WESTERN	

Relevance HSP90 has been identified in the cytosol, nucleus and endoplasmic reticulum, and is reported to exist in many tissue types. In several tissues, including smooth muscle, HSP90 comprises up to 2% of total cellular protein. HSP90 functions as a dimer, assembled as part of heterocomplex. It possesses ATP-binding site and low ATPase activity. HSP90 is able to associate with actin filaments in certain conditions. Another important property of HSP90 is the binding of unoccupied steroid hormone receptors. HSP90 has been characterized as a molecular chaperone able to keep the target protein in a folding-competent state. It has an enhanced chaperone activity in oligomeric form at high temperatures. HSP90 function is sensitive to bivalent cations concentration.
